

**Mandatory Public Notification Language  
for a Routine Monitoring Violation (TCR 23&24)**

The Lower Valley Water District water system, PWS ID# 071054, failed to collect the required number of bacteriological samples for coliform monitoring of the water distribution system during First Quarter of 2011. This monitoring is required by the Texas Commission on Environmental Quality's "Drinking Water Standards" and the federal "Safe Drinking Water Act", Public Law 95-523. Bacteriological samples are used to monitor water quality and indicate if the water is free of coliform bacteria. Our water system is required to submit 60 bacteriological samples each month. Failure to collect all of the required bacteriological samples is a violation of the monitoring requirements and we are required to notify you of this violation.

for a Routine Monitoring Violation (TCR 23&24)**

The Lower Valley Water District water system, PWS ID# 071054, failed to collect the required number of bacteriological samples for coliform monitoring of the water distribution system during Second Quarter of 2013. This monitoring is required by the Texas Commission on Environmental Quality's "Drinking Water Standards" and the federal "Safe Drinking Water Act", Public Law 95-523. Bacteriological samples are used to monitor water quality and indicate if the water is free of coliform bacteria. Our water system is required to submit 60 bacteriological samples each month. Failure to collect all of the required bacteriological samples is a violation of the monitoring requirements and we are required to notify you of this violation.

**Mandatory Public Notification Language  
for a Repeat Monitoring Violation (TCR 25&26)**

Each month, Lower Valley Water District water system, PWS ID# 0710154, is required to submit water samples for bacteriological testing. The samples we submitted during May, 2011 contained coliform bacteria. The presence of coliform bacteria indicates a potential problem with our water treatment system or the pipes that distribute the treated water. Whenever we find coliform bacteria in a routine sample, the Texas Commission on Environmental Quality requires us to collect a specific number of repeat samples to help determine whether or not there is a problem.

The failure to collect any or all of these repeat samples is a monitoring violation and we are required to notify you of this violation. If you have any questions regarding this violation, you may contact:

Phillip Marin
